Build your school's AI program · Setup sheet

Four blocks, four minutes each. Short notes are fine; skip what you don't know yet.

Everything you write here is something you'd otherwise type into prompts forever. Afterwards:

1. Download the kit: `github.com/ariel-coder-maker/school-ai-starter` → **Code** → **Download ZIP**
2. Open the folder in Claude Code, Codex, Cursor, Copilot or Gemini.
3. Type `setup` and send a photo of this sheet. It reads your answers by code (A1, B4…) and asks only what's missing.

A You and your school

decides where setup starts · becomes 00_school/ — **4 min**

A1	Your role	☐ Teacher ☐ Dept head ☐ Coordinator ☐ IT ☐ Leader ☐ Other _____
A2	What do you want first?	☐ One course ☐ A department ☐ Whole school ☐ Just exploring
A3	Your AI tool	☐ Claude ☐ ChatGPT / Codex ☐ Cursor ☐ Copilot ☐ Gemini ☐ Other ____
A4	Used a terminal (command line) before?	☐ Never ☐ A little ☐ Comfortable
A5	Level 1: just a folder, nothing to install. 2: adds the engine (Docker + API key). 3: on a school server	☐ 1 Folder ☐ 2 + engine ☐ 3 School-hosted Most people start at 1
A6	Where will the folder live?	☐ My computer ☐ Google Drive ☐ OneDrive ☐ School network
A7	School (optional), city, country Country decides what can be bought, and local examples	
A8	Program	☐ IB MYP ☐ IB DP ☐ IB PYP ☐ AP ☐ IGCSE / A Level ☐ National / state: _____
A9	Grades in scope, and what you call them e.g. "Grades 6–10 = MYP 1–5"	
A10	Language of instruction · spelling · students learning in an additional language	Language: _____ ☐ US ☐ UK spelling About ____ % learning in an additional language

B Calendar and assessment

entered once, usually by the coordinator · becomes 00_school/ — **4 min**

B1	School year: number of terms and their dates	
B2	Learning weeks per term Not holidays, exams or trips	
B3	Period: minutes timetabled / actually taught · lessons per week	____ min timetabled / ____ min taught · ____ lessons a week
B4	Unit shape: units per term, lessons per unit, when summatives must finish	
B5	Criteria and grading scale; what a rubric must look like e.g. MYP A–D on 0–8; A–F; IGCSE 9–1	
B6	Planner platform, and fields every plan must fill e.g. Toddle, ManageBac, Atlas; ATL, inquiry questions	
B7	Policies that change the work Homework, devices, AI use, safety	
B8	House style: reading level, tone, format, never-dos	
B9	Who owns this layer and updates it each year?	

Setup sheet · Blocks C and D

Skip anything you don't know yet. Setup records it as TODO.

C Curriculum and resources

one subject first · becomes 01_curriculum/, 02_sources/, 03_resources/ — **4 min**

C1	Subject first, and which grades	
C2	Assessment criteria The AI never writes criteria from memory	☐ IB MYP (strands from our guide) ☐ I have the official document ☐ Not yet
C3	Standards you align to	☐ NGSS ☐ Common Core ☐ AERO ☐ National / state _____ ☐ None
C4	Existing scope and sequence or unit plans? Where?	
C5	Textbooks and sources you're licensed to use	
C6	Topics to avoid · local context to include	
C7	Rooms and equipment Labs, studios, devices per student	
C8	Materials: inventory? Buyable locally? Budget per term?	
C9	Class size · most groups at once	____ students · up to ____ groups
C10	Learning support to build in General needs only, never names	

D First output, checks and engine

becomes 05_checks/ · D5–D8 only for Level 2 and 3 — **4 min**

D1	The first thing it should make	☐ Unit plan ☐ One lesson ☐ Worksheet ☐ Slides ☐ Rubric
D2	File types you'll open	☐ Docs / Word ☐ Slides / PowerPoint ☐ PDF ☐ Plain text
D3	One rule every output must pass One sentence. If you can't state it, the AI can't meet it. e.g. "every question names its criterion"	
D4	Who approves each step before students see it?	

Never write an API key on paper or paste it into a chat. Setup shows you the file on your own computer to type it into.

D5	AI providers you have or can get keys for	☐ Anthropic ☐ OpenAI ☐ Google Gemini ☐ DeepSeek ☐ Qwen ☐ NVIDIA (free) ☐ OpenRouter
D6	Monthly spending limit · cheapest model first?	$ _____ a month ☐ Cheapest first
D7	Where will it run?	☐ My laptop ☐ School server ☐ Cloud machine
D8	Who looks after it: updates, backups, keys?	

Guardrails: no student personal data in the folder · a teacher approves everything students see · the school owns the folder · use the AI providers your school's policy allows · never paste an API key into a chat.
